

**App Name:** CutThru  
**Created by:** Jonathan Danzig

**Category:** Navigation

**Description:** Have you ever walked outside in the freezing cold or scorching heat and thought to yourself, “Can’t I get to my destination faster, except more comfortably and indoors?” Now, there’s an app for that.

Start walking smarter today with CutThru, your personal pedestrian assistant. Using your location and up-to-date localized data, find buildings near you that provide both climate control and a shortcut. After all, “Neither snow nor rain nor heat stays these pedestrians from their path.” Happy walking!

Future releases will include the option for users to provide corrections and comments for inaccurate routes, favorite routes, and receive dynamic updates to building data.

**Keywords:** walk, shortcut, short cut, cold, warm, indoor, route, hours, path, building, map, pedestrian

**Age:** All ages

**Compatibility:** This app is optimized for iPhone 5 or later.
